

REPORT NEAR MISSES

BEFORE THEY CAUSE INJURY TO
YOU OR YOUR CO-WORKERS

Ever have one of those days where you just seem to be lucky? Perhaps you narrowly miss a car while driving or a hammer falls and just missed you by a few feet. Please understand that luck has absolutely nothing to do with it. These types of incidents are known as “near misses” and they need to be thoroughly investigated to prevent it from happening again, as the next time, you may not be so lucky.
